iD Hand Bumper

software integration

The Nedap handheld reader can be used in combination with iOS devices (iPod touch, iPhone and iPad), and Windows CE devices. For both platforms there's an open API that enables retailers and 3rd party integrators to make their own applications based on the handheld reader. Nedap will have applications on Apple's App Store that utilize the full functionality of the device.

color combinations

- Standard available in white cover. Covers in other colours allow a minimum order quantity.
